

TS Twister Meter Seal

The **TS Twister Seal** is an easily applied meter security seal for all types of meters, including gas, electricity and water meters. The UV-resistant polycarbonate body houses a coloured insert with a **one-way rotating locking mechanism**.

Once sealed, the locking mechanism is completely **encased**, meaning tampering is extremely difficult - any tamper attempts are clear from viewing the locking insert through the transparent body. Seal is available with **white patch** and extended flag options for higher **barcode contrast** on transparent body. Suitable for use as an **OAMI meter seal**.

Applications

Utility meters (OAMI, gas, electrical and water meters), taxi, telecommunication & postal sectors.

Material

Polycarbonate (PC) body, polyacetal (POM) insert and steel sealing wire. UV-resistant materials.

Size Guide

23x12mm flag / 40x15mm flag (XL) / 42x21mm flag (WF version – white plate ultrasonically welded to flag). Variable length sealing wire.

Technical specs

Nylon operating temperature: -40°C to +120°C
Tensile strength: 40KgF
Compliant with RoHS Directive

Available Colours

Clear or white body as standard, with choice of insert colours: red, blue, green, yellow and orange – other colours on request.

Packaging

TS with pre-attached 20cm wire	
Quantity	1,000pcs
Carton Dimensions	24x40x22cm
Box Weight	4.5kg
Pallet Info	80x120x190cm 80,000pcs

Customisation Options

Company marking, logo, 8-digit sequential numbering, barcoding (128, Int 2/5 etc...)

Optional features: extra-large flag areas, and white patch for improved barcode contrast.
