

CHU16/CHU32 METERED CONNECTION UNIT

The most popular connection unit in our range, the CHU16 can be supplied with either a side socket as shown or a socket mounted on the base of the enclosure.

The polycarbonate reset flap allows the user to safely reset the RCBO protecting the home.

Increasing demands for larger supplies for holiday homes has seen the creation of the CHU32 unit giving the park operator greater flexibility when deciding upon pitch supplies.

An RCBO of up to 32 Amps can be fitted, with the parks cable infrastructure designed around this increased supply.

Features

- Enclosure Rating IP56
- Terminals: 2 x 35mm
- RCBO: 30mA 2 Pole
- Meter : 100A Class MID Approved
- Customer Reset Flap : IP56 Four Module
- Socket Outlet: 16A or 32A 230V IP44 2 Pin + Earth.
